

About Us

Being the world's leading manufacturer and supplier of Nitinol materials and components isn't easy. We've risen to the challenge.

Our high volume production capacity, superior quality, and unmatched expertise in all things Nitinol keeps us at the forefront of the industry. Since 1991 we have been pioneering Nitinol materials and manufacturing processes for the medical, industrial, and consumer markets globally.

Having a diverse Nitinol portfolio including materials produced to the most stringent mechanical specifications and with the highest purity material, to the most delicate and intricate implantable devices on the market allows us to meet our customers' requirements in the ever changing and demanding world of medical devices.

Our staff is comprised of the industry's leading experts in Nitinol materials technology, processing, & development. With hundreds of published papers & patents and as consultants to regulatory agencies, we set the standard for Nitinol innovation in materials, processing, testing, design & development.

We are an independent, privately held company completely dedicated to and focused on Nitinol technology. Educator. Innovator. Manufacturer. Let us be your partner of choice from conceptualization to commercialization.

We are Nitinol.™
